crysis 2 features two main factions -- the hectic and the outcasts. the outcasts are a group of human renegades that have joined forces with a race of aliens known as the grine. one of their goals is to use the biological warfare created by the aliens to infect the human population with a virus that will cause the entire race to turn on itself. the hectic have a somewhat different goal. they want to wipe out the entire race of alien invader, but they're not averse to using the same biological weapons the grine have created. both factions have their strengths and weaknesses, and the main fight is to see which side can field the more powerful military force. the gameplay of crysis 2 is very similar to that of the original crysis. players will be able to choose from one of three different classes. the soldier is fast, hard-hitting, and well-armored. he can use any of his weapons, and his abilities are limited only by his stamina. the first crysis was available at a price of \$59.99 on xbox 360. this did not stop many gamers from purchasing it. it was one of the best selling games and was given a game of the year award. now, crysis 2 is available for a price of \$49.99 on xbox 360 and \$59.99 for ps3. a lot of players are already reporting a great performance from this game, but i doubt it would be as good as the first. the game is taking a little bit longer to download than the first game, but i am sure that is just the servers and servers being slow. the first game was a pretty solid game for a stealth game. it also took quite a bit of time to get used to the controls, but once you did it was very enjoyable.
